### 步骤二 无忧听写练习（参考答案见章末）

不看下文，听录音，按照录音中的要求，把你听到的内容写到空白练习纸上。

Since early times, people have been fascinated with the idea of life existing somewhere else besides earth. Until recently, scientists believed that life on other planet was just a hopeful dream. But now they are beginning to locate places where life could form. In 1997, they saw evidence of planets near other stars like the sun. But scientists now think that life could be even nearer in our own solar system. One place scientists are studying very closely is Europa, a moon of Jupiter. Space **probes** have provided evidence that Europa has a large ocean under its surface. The probes have also made the scientists think that under its surface Europa has a rocky core giving off **volcanic** heat. Water and heat from volcanic activity are two basic conditions needed for life to form. A third is certain basic chemicals such as carbon, oxygen and nitrogen. Scientists believe there might be such **chemicals** lying at the bottom of Europa's ocean. They may have already created life, or maybe about to. You may wonder if light is also need for life to form. Until recently, scientists thought that light was essential. But now, places have been found on earth that are in total in blackness, such as caves several miles beneath the ocean. And bacteria, **primitive** forms of life have been seen there. So the lack of light in Europa's **subsurface** ocean doesn't automatically rule out life forming.

### 步骤三 听力理解测试

根据刚才听到的录音，为下列各题选择正确的答案。

- What did scientists once believe according to the passage?
  - There were no planets without moons.
  - There was no air or water on Jupiter.
  - Life was not possible in outer space.
  - The mystery of life could not be resolved.
- What have scientists found about Europa, a moon of Jupiter?
  - It has a number of active volcanoes.
  - It has an atmosphere like the earth's.
  - It has a large ocean under its surface.

- D) It has deep caves several miles long.
3. What have scientists come to know recently about the formation of life?
- A) Light is not an essential element to it.
- B) Life can form in very hot temperatures.
- C) Every form of life undergoes evolution.
- D) Oxygen is not needed for some life forms.

#### 步骤四 核对总结分析

核对听力原文，把听写中的各类错误总结规划到表格中，日后重点复习。

序号	错误类型	实例汇总
1	连读、弱读	
2	美式发音	
3	纯生词	
4	拼写错误（单复数）	
5	单词发音不熟	
6	语法问题（时态等）
