Thank you for coming, everyone. Today's presentation will show how we see the development of the motor car in the short to **medium** term, and that is why we have invited all of you here today. Let's start with power. It's clear that petrol-driven engines have no future. Already there are many **alternative fuel** vehicles on the market, powered by anything from solar power to natural gas. Some independent thinkers have even produced cars that run on vegetable oil. But as we all know, of all these alternative fuel vehicles, the most practical are electric vehicles. Sure, in the past electric vehicles have their problems, namely, a limited driving range, and very few **recharging** points, which limit their use. Now, however, recent developments in electric vehicle technology mean they can match conventional petrol engines in terms of performance and safety. Let's not forget that electric vehicles are cleaner. Plus, importantly, the power source is rechargeable, so this does not involve using any **valuable** resources. Moving on to communications, very soon, cars will be linked to GPS satellites, so they'll do all the driving for you. What controls remain for the users will be audio-based. So, for example, you'll just have to say "a bit warmer", and the air conditioning will adjust automatically. You'll also be able to receive email, music and movies, all via an internet link. So just type in the destination you want, sit back, sleep, watch your movie, whatever.

人生真谛

所有的交往都是从第一印象开始的，良好的第一印象往往是我们交往成功、人际关系和谐的良好开端。因此在我们与人的初次交往过程中，要注重细节，抓住机会，争取给人留下良好的第一印象。人都有以第一印象定好坏的习惯，认为一个人好时，就会爱屋及乌，认为一个人不好时，就会全盘否认。
